

# Updated Design

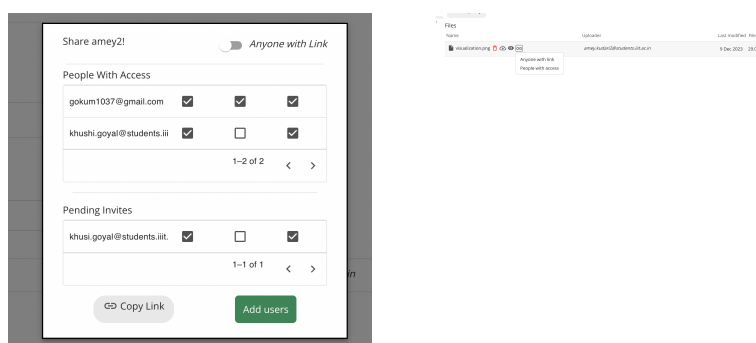

## This contains designs for the added Features

### ▼ Multi File Uploads

The Multiple Files can be selected and uploaded simultaneously. The loaders bars shows progress of the file uploads, after which the files can be viewed

### ▼ Link Sharing

The links of the folders, files can be shared with public or restricted access. Through these links, the resource can then be shared to external users as well as registered DFS users. The user is redirected to Login if links requires authentication
